## WEIGHPACK SYSTEMS

WeighPack Systems is a packaging industry leader with an extensive product line, leading edge technology and a strong commitment to customer service. These factors contribute to our continued growth and success.

Since 1992, WeighPack Systems has delivered packaging systems for varied and diverse applications. Equipment has been installed in North and South America, Europe, Asia, Middle East and other areas of the world.

Now with three System Centers in Las Vegas, Miami, and Montreal, WeighPack is focused on bringing service and support closer to our customers.

## TOTAL SYSTEM SOLUTIONS

WeighPack supplies a complete range of machines from the well known Vertek and XPdius Series of vertical form and seal baggers to the Swifty line of horizontal bagging and form seal machines, Primo multi-head weighers, Star Auger Fillers, AutoWeigher, TigerScale linear scales and conveyors of all types. WeighPack provides complimentary design services and integration for complete packaging systems.

# BAGGING SOLUTIONS

## SWIFTY 3600™

Straight flow through design  
allows for easy access

## Horizontal Bagging

WeighPack's horizontal line of baggers for pre-made bags includes the Swiftly, Zippy, Bingo and VS baggers. These models can handle both wicketed and non-wicketed bags as well as zippered and stand-up designs. The r2b is a horizontal form and seal bagger that uses roll stock film to form 3-sided seal, 4-sided seal, side-gusset, flat-bottom and stand-up pouches with or without re-sealable features.

- Uses either pre-made bags or roll stock film
- Designed to handle a variety of bag styles
- Produces up to 240 bags per minute depending on models

## BINGO BAGGER™

MAP/CAP capability for  
extended product shelf life.

## R2B™

Creates a variety of different  
package types

**XPDIUS ELITE JR™**  
Small machine footprint.  
Stands under 4 ft tall

## Vertical Bagging

WeighPack's Vertical Form and Seal line of baggers includes the Vertek and XPdius series. Using roll stock film to form and seal a bag during the packaging process, our different models can produce bag sizes as small as 0.75 inches wide to 24 inches wide.

- Open frame design greatly improves accessibility and service-ability
- Forms bags from 0.75" wide to 24" wide depending on model
- Produce bags at speeds up to 110 bags per minute depending on model

**VERTEK 2400™**  
Handles bags up to  
24" wide

**VERTEK 750™**  
Simple design is very  
operator-friendly

**XPDIUS ELITE 1200™**  
Open frame design for  
service-ability and  
accessibility

## FILLING SOLUTIONS

### PRIMOWEIGHER™

Open frame design for easy maintenance

### Scales & Auger Filling

This family consists of the Primo series of multi-head weighers, TigerScale linear scales, Star Auger fillers and Auto Weigher table top scales. The PrimoWeigher is the evolution in combination scale technology. Available in 10 and 14 head configurations, it is ideal for high speed applications. Designed to handle weights up to 7 pounds and run at speeds up to 110 per minute depending on model.

The Tigerscale line of linear scales are offered in two different models - vibratory or conveyORIZED. Available in 2, 3 and 4 lanes depending on your required speeds and output, models are available to fill from 10 grams to 100 pounds.

- Available in many types of configurations to suit a variety of different products
- Washdown models available
- Tool-less disassembly

### TIGERSCALE™

Multiple lanes for mixing products, quick disconnect weigh bucket and funnel

### V-25 TWIN LANE

Bulk applications  
(2 lbs to 200 lbs)

### STAR AUGER™

Hinged hopper door for easy access and quick changeover

### AUTO WEIGHER™

Load cell not cantilevered, quick disconnect parts

## Systems

With WeighPack's range of packaging machinery, we are your single source solution for complete packaging systems. With our experienced engineering department, we can create a fully automated system to meet your project requirements.

VERTEK JUNIOR, PRIMOWEIGHER  
AND INFEED CONVEYOR

PRIMOWEIGHER  
AND SWIFTY BAGGER

## Case Erecting

With a small footprint, Eagle's T12 case erector/taper will automatically open, tuck and seal the underside of the box. A simple user-friendly design engineered to produce up to 12 cases per minute.

EAGLE'S T12 CASE ERECTOR/TAPER

## Conveyors

Designed for box, bottle or container filling automation, our indexing conveyors are available in different widths and sizes to convey and position rigid containers of all types under a fill station.

### **SINGLE SOURCE SOLUTIONS**

With an extensive range of baggers, fillers, case erectors and conveyors, WeighPack truly is a single source provider for most of your packaging equipment needs.

### **UNIQUE SOLUTIONS FOR YOUR UNIQUE APPLICATIONS**

WeighPack provides engineering, manufacturing and system integration

### **COMPLETE SYSTEM INTEGRATION AND SERVICES**

Our complimentary design, engineering and consultation services will help you choose the best system for your application.

### **ONE CALL TECHNICAL AND SERVICE SUPPORT**

With a staff of highly trained service technicians, we offer 24/7 telephone tech support. Appreciate when one call solves any issue with your equipment. We carry parts on all products we supply and our factory trained field techs can service all our machines.

with our team of experienced mechanical and electrical engineers, WeighPack can customize your system to meet your exact project requirements.

#### SELECTION

For all ranges of production rates and budgets, expect unbiased advice on choice of solutions.

#### VALUE

Dollar for dollar, you get much more than most other brands. Being a single source for all equipment gives us a great edge in value.

#### QUALITY

Compare the construction of our products and you will quickly recognize excellent workmanship, construction and design.

#### SERVICE

with 3 System centers in the US and Canada to service you, we offer same day parts shipment on most items, 24/7 telephone support, factory trained field technicians to fix any problem on any machine we sell. Not every competitor can make this claim.

#### INNOVATION

Each of our machines are designed with our customers in mind. Not just performance, more so maintenance, service-ability and clean-ability. Study well and appreciate the design benefits that will reduce your operating costs.
