

# Cablevey Conveyors Corporate Capabilities

## Corporate Description

Cablevey Conveyors, a family owned company, was founded in 1971 to service the agriculture industry primarily conveying grain and seed. Headquartered in Oskaloosa, Iowa, the center of the grain belt, allowed the company to offer complete customer satisfaction for this important industry. The success in the USA turned international with product distributed throughout over 65 countries.

Over 40 years of reliably conveying products led Cablevey to engineer and build high quality industrial conveying systems.

Currently, Cablevey Industrial Division, has confidently conveyed approximately 900 different products for the top-tier food processors globally and other Fortune 500 companies.

## Technologies

Cablevey Conveyors' cable and disc technology gently move products through an enclosed tube without the use of air. Systems can convey up to 1240 cubic feet (35 cubic meters) per hour.

Coffee, nuts, snack foods, cereal, flakes, powders, pellets, shavings, crumbles, granules, fluff and dust can all be handled with ease. Numerous layouts available using multiple inlets and discharge points customized to your specifications.

Product separation and degradation are practically eliminated. Cablevey replaces Bucket Elevators, Screw Conveyors, Pneumatic and Aeromechanical Systems.

## Markets Served

Cablevey conveys materials for food processing, coffee, pet food, cereal, tea, chemical, plastic, paper, waste-water, petro-chemical, wood, soap, paper, pulp and wood industries.

## Facilities

The headquarters facility in Oskaloosa, IA includes: engineering, research and development, assembly, marketing, sales and a product testing lab.

## Major Products

All systems utilize cable and disc technology and operate at convey speeds which average 100 ft. (30.48 meter) per minute.

### 2000 Series

2 inch (50mm) diameter tube Conveys up to 75 cubic feet (2.12 cubic meters) per hour

### 4000 Series

4 inch (100mm) diameter tube Conveys up to 525 cubic feet (14.87 cubic meters) per hour

### 6000 Series

6 inch (150mm) diameter tube Conveys up to 1240 cubic feet (35 cubic meters) per hour

(641) 673-8451
