VENTILATION SOLUTIONS TO MEET ALL FACILITY REQUIREMENTS

INNOVATIVE AIR POLLUTION CONTROL SYSTEMS
FOR INDUSTRIAL ENVIRONMENTS

Schust provides turnkey industrial ventilation systems that clean the air in commercial and industrial work environments. We assess, design, manufacture, and install effective air pollution control systems that are tailored to individual customers' needs. Our commitment and industry expertise assures a complete, unique, engineered solution for all requirements.

SOLUTIONS FOR EVERY STAGE OF YOUR SYSTEMS PERFORMANCE

ENGINEERING SERVICES & STUDIES

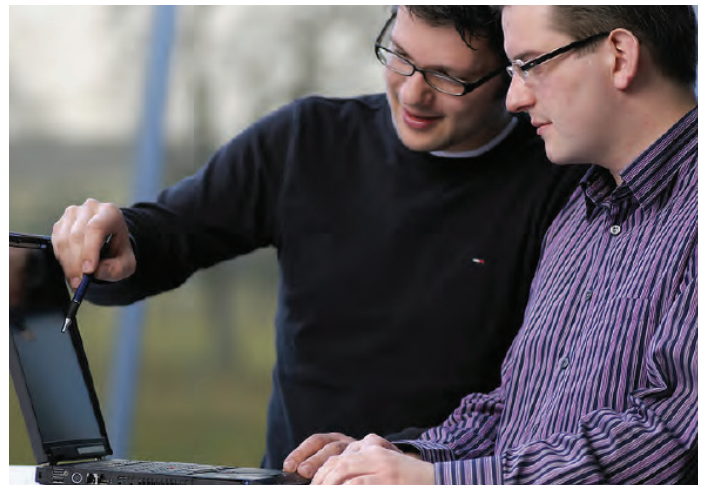

We will perform a plant ventilation audit to recommend adjustments or improved designs that will support your ventilation goals. Engineering services include:

- Design, Structural, Control Systems, Electrical, Mechanical, and Foundational Engineering
- CAD hood concepts and ducting schematics
- Recommend improvements for any emissions capture such as OSHA rule 1910.1053 respirable crystalline silica and NFPA 652 combustible dust
- If necessary, changes to volume requirements needed to control process emissions.

TURNKEY PROJECT MANAGEMENT

Regardless of project size, the Schust Project Management Team provides you with:

- Concept and design
- Engineering and detailing
- Scheduling
- Procurement and fabrication
- On-site supervision
- Installation/coordinator
- System start-up and commissioning

FABRICATION & MANUFACTURING

Fabrication capabilities include specialized contract fabrication, sheet metal, structural, HVAC, dust collection equipment, poppet boxes, ducting, and other large collector components. Our 100,000+ sq. ft. manufacturing facility includes:

- 3D CAD drafting services
- CNC laser and plasma burn tables and press brakes
- Sheet metal and plate rolls
- High bay layout and overhead cranes
- Finishing operations include SSPC capabilities.

INSTALLATION

Our field teams ensure the safety and quality of work for each system installation. Teams are trained according to the most recent codes and standards.

- OSHA trained installers
- AWS certified welders
- Expert field supervision
- Factory-mobilized, fully equipped service vehicles
- Field Crews are PPE-compliant

INSPECTIONS & MAINTENANCE

Schust provides complete maintenance and inspection services that optimize your ventilation system's operation. After our on-site assessment, a written inspection report includes the following:

- Current physical condition of APC equipment and system components
- Layout drawings indicating location of repaired or defective pulse valves, blowpipes, leaking filter media, and venturis on all baghouse units
- Analysis of the system air volume, static and velocity pressure, filter pressure drop, and emissions testing as required.
- List of recommended repairs or modifications to maintain or improve your system's operation.

echeuch

Scheuch USA is a subsidiary of Scheuch Group. Scheuch USA, with its two divisions Camcorp and Schust; design, engineer and manufacture air pollution control and pneumatic conveying systems.

SCHUST

Schust understands the challenges facing of today's industrial work environment. Our adept approach to engineering and manufacturing means each system is optimized for its unique environment.

CAMCORP

Camcorp's dust collection and pneumatic conveying systems are tailored to each customer's need. Our experience spans a complete breadth of industrial applications.
